TITLE: Granulating a composite fertiliser mixt. - by
rapidly homogenising the
molten slurry and solidifying droplets in a tower with air
flow

PATENT-ASSIGNEE: MITSUI TOATSU CHEM INC[MITK]

BASIC-ABSTRACT: A composite fertiliser in which the
components are insol. on
only partially soluble is mixed in the molten state by a
pneumatic homogeniser
revolving at 10,000-30,000 rev sec-1. The slurry is
granulated by dropwise
introduction to a hollow tower with a current of air. The
prod is screened
after cooling. The fertiliser may contain ammonium
nitrate, urea potassium
salts, phosphates, ammonium salts, and opt. herbicides and
insecticides.
